Coin Counting and Wrapping Machine WR-500/90

Coin wrappers have become required equipments for CIT/armored carrier companies, mints and other industries in many different countries. Glory WR series have met their needs, with enhanced speed and performances. The WR-500 and WR-90 count and wrap coins smoother than conventional wrappers.

Continuous Operation

With newly designed coin transporting and stacking units, the WR-500 and WR-90 have realized smoother performance, and have drastically improved continuous operation.

▲ Fully-opened upper and front doors

Improved Operability

With utilization of built on LCD control panel, screen visibility and operability were improved dramatically. The processing mode and data contents may be checked quickly and easily. Furthermore, easy-to-understand illustrated operation guide provides accurate and applicable support.

▲ Separated LCD control panel

▲ Illustrated operation guidance display

Multilanguage display

Different languages may be selected on the LCD panel, such as English, German, French, Spanish and so on (default is English).

Advanced detection capability against forged coins and foreign materials*

Detection against forged coins and foreign materials* have been improved. A non-designated denominations or foreign material coins are automatically rejected to a dedicated box. It enables WR to keep speedy and accurate counting and wrapping operation.

* Available with optional recognition sensors.
Euro models are standard equipped with the recognition sensors.
